

Corsair Force GT 120GB SATA3

Fiercely competing with Kingston every chance they get, Corsair has been making some waves in the SSD market for a little while now, offering superior warranties, great after-sale support and - most importantly - extreme performance. Corsair often attracts a slightly higher price tag, but in many ways it is certainly worth the extra coin.

In this case the GT shows us what a

ACCESS TIME (READ): Milliseconds (Lower is better)

real SSD performs like, putting the OCZ Revo 3 to shame in both random read speeds and access time. The only place it falls behind on is the write speeds, to which the OCZ Revo flogs it by 100MB/s. This drive is about as good as it gets for 2.5" - perfect for your next Beastie.
